To whom it may concern,

RE: Kaneka Official Statement on March 11th Earthquake and Tsunami

We, QOL Division of Kaneka Corporation, hereby declare that our products do not have any influence of radiation by the accident of Fukushima Nuclear Power Plants which are located more than 600km far from Kaneka Takasago Plant.

One of the main concerns we have heard from you, our customer, is the radiation stemming from the instability of the nuclear plants. From day one of this crisis, Kaneka has taken preventative and proactive measures to ensure that the quality you have come to expect from us over the last 30 years is maintained.

The following steps are being taken by Kaneka to ensure your products remain safe:

- 1) Kaneka is checking Japanese government daily report on radioactivity level (air, drinking water and fallout) of surrounding prefectures of our production site and making sure that environmental radioactivity is within normal range.
- 2) Kaneka is checking environmental condition of delivery route of our products in the same way.

At Kaneka, we take quality and safety seriously and want to ensure our customers that every precaution is being taken to address the situation. Please use this letter as verification that all Kaneka material is, and will continue, to be safe for manufacture and use by the end consumer.

We would like to thank all of you for your support in this trying time. We will continue to keep you up to date on the situation.

Sincerely yours,

Yoshimi Uchida
Executive Officer
General Manager
QOL Division
